

~~SECRET~~~~NOFORN~~

U.S. DEPARTMENT OF ENERGY

## memorandum

DATE SEP 10 1981

REPLY TO  
ATTN OF: DP-542

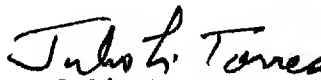

SUBJECT: Input to CCPC Study

TO: John LaBarre, IA-41

ISA has been asked by Lee Martin of your staff to provide input to the CCPC study, and our submission is attached. (U)

As you know, as part of the overall STIC activities, OISA is playing a substantive role in the STIC Technology Working Group, the STIC Collection Subcommittee and in the preparation of a special study of technology transfer for the Senate Select Subcommittee on Intelligence; and as such we have direct interests and responsibilities related to the CCPC. On this basis, OISA staff have already held informal discussions with the CCPC staff and will share with them a draft copy of the attached information. (C/NF)

In view of ongoing OISA activities and responsibilities in this area, I feel that OISA and IA should jointly represent DOE interests in this type of CCPC and any related follow-on activities. (U)

Julio L. Torres
